listing Description

Acquaint Softtech is a leading web and software development company specializing in custom web and mobile application development. With 15+ years of experience, we have grown into a trusted technology partner with a team of 70+ skilled Laravel developers. As an Official Laravel Partner, we bring deep expertise in Laravel-based solutions, delivering scalable, secure, and high-performance applications. Our core services include custom web development, mobile app development, eCommerce development solutions, headless CMS solutions, and Laravel services, leveraging modern frameworks and tools like Bagisto (for eCommerce) and Statamic (for headless CMS solutions). We are experts in IT staff augmentation, remote development teams, and outsourcing services, helping businesses scale with skilled and flexible talent. With over 1,200 clients across 72+ industries, we combine technical excellence with industry best practices to drive digital transformation. Backed by 45+ technologies and a commitment to innovation, Acquaint Softtech empowers businesses with customized, future-ready solutions—from enterprise applications to cutting-edge SaaS platforms. As a Laravel-certified team, we ensure robust architecture, seamless integrations, and long-term scalability for every project. Partner with us to turn your vision into reality with Laravel's power and precision.
