listing Description

Balustrading Concepts are leaders in the design, construction and implementation of aluminium and glass balustrades, safety fences, commercial gates, handrails and pool fences(pool balustrade) in the Auckland area. With balustrading as our core business, we specialise in providing customised solutions, using materials manufactured in New Zealand or supported by New Zealand distributors and manufactures that meet the New Zealand standards. We custom build balustrades to suit and we can also design to meet special needs, such as high wind zones.
