listing Description

China Topper [Wheel Excavator Manufacturer Co., Ltd.](#) is a leading and reputable engineering machinery manufacturer headquartered in Quanzhou, China. With nearly two decades of industry experience, we specialize in the design, development, and production of high-quality wheel excavators, crawler excavators, and log grabbers. Our unwavering commitment to innovation, durability, and advanced technology has earned us a trusted reputation both domestically and across international markets. Our modern manufacturing facility covers an expansive 60,000 square meters and employs over 300 skilled professionals dedicated to precision engineering and efficient production. We consistently achieve annual sales ranging between USD 100 million and 150 million, with 30% to 50% of our products exported worldwide. This impressive performance demonstrates our strong manufacturing capacity, streamlined operations, and steadily expanding global footprint.

At Topper, we adhere strictly to international quality standards to ensure every machine delivers outstanding reliability and performance in the field. Equipped with cutting-edge machinery and supported by rigorous quality control protocols, our production lines guarantee products that meet or exceed customer expectations. As an ISO 9001 certified enterprise, we continuously pursue operational excellence, providing durable, high-performance machinery solutions that fulfill the diverse needs of customers around the world.
